

Soho

Product overview

Stylish look

Designed with ♥ for London, built with materials sourced from Germany.

Excellent noise insulation.

-31 decibel, or 44% noise reduction, from "traffic" to "quiet library" noise levels*.

Premium Interior

Scratch resistant shelf, special acoustic felt and a height adjustable stool (add-on).

Easy Assembly

You can assemble the booth yourself or get our optional assembly service.

*Based on testing where a noise source of 70 decibel ("traffic" per the dB Meter tool) was placed inside the booth, resulting in a reduction to 39 decibel measured from outside of the booth ("quiet library" per the dB Meter tool)

Premium interior

Special acoustic felt

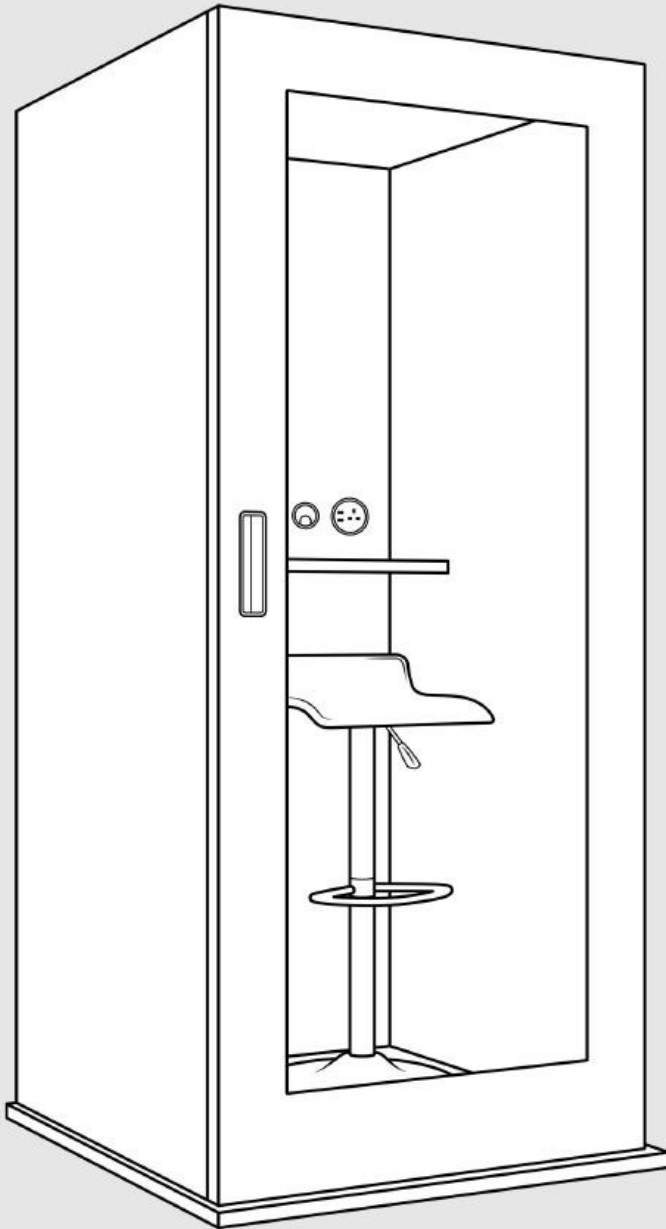

The interior looks and feels great. It's sound absorbing so you can enjoy some privacy in the busy office

Eco-friendly

Our interior lining is made of 100% recycled polyester. Each booth contains over 800 recycled water bottles!

The manufacturing process of PET acoustic felt is a remarkably clean process. No chemicals are used in conjunction with a low energy process. All unused PET such as scraps cuttings are 100% recyclable and put straight back into the manufacturing process, leaving no disposable waste.
